Assignment 6 - Portfolio Website

Due Wednesday, April 6 (you have 19 days)

For this assignment, use Adobe Dreamweaver to create a portfolio website. This website will display the work you have created in this class. Your website should consist of a **main page (index.htm)**, an **About Me** page with information about yourself, and links to five previous projects. These five projects should be:

- Assignment 1 - Animation Loop
- Assignment 3 - A Web Page in Dreamweaver (Working with Text)
- Assignment 4 - Digital Art Writing
- Assignment 5 - Video Project
- The fifth project is up to you - choose one of the works you created last semester.

If there are other things you would like to add to your website (for example, work in other media, or links you find interesting), you are welcome to do that, but it isn't required.

Assignment 6 is due on **April 6**. On that day you should be prepared to discuss your work in class, and hand in your work for grading (as an HTML file and image files). After the crit we'll put your portfolio websites on the web (this is optional).

You will have some class time to work on this assignment.
