### Assignment 2: Illustrator Diptych

**Due Wednesday, October 5 (you have 14 days)**

We will begin exploring the idea of sequence and series of images by creating a pair of images. Using Adobe Illustrator, create two images that work both individually and together, as a diptych. A minimum of 4 visual elements should be carried from one image to the other.

Assignment 2 is due on **October 5**. On that day you should be prepared to discuss your work in class, and hand in your work (as an Adobe Illustrator / AI file) on a USB flash drive for grading.

You will have some class time during the next two classes to work on this assignment.
